SUSTAINABILITY

PEOPLE & SYSTEMS MANAGEMENT

People Focused, Practical Solutions

Informed and skilled people are critical for the successful integration of environmental, safety and sustainability aspects into a businesses day to day activities. Our team works with your people to assist departments and businesses achieve their full potential in the area of sustainability. This can be achieved through developing skills and knowledge through education, practical experience and leadership, to developing systems, operational and strategic practices that are both practical and sustainable.

Services include:

- Safety training and awareness packages.
- Safety and sustainability integration and cultural change.
- Compliance and safety auditing including incident investigation.
- Coaching and mentoring environmental and safety personnel.
- Solution identification.
- Management system development, implementation and assurance.
- HSE software selection and implementation.
- Project management.
- Process mapping.
- Business process reviews and improvements.

We are also able to provide in-house expertise and HSET professionals for on-ground coverage, support and project implementation.
