

COMPLIANCE REPORTING

Compliance Reporting is required to abide by many environmental approval conditions. At Integrate Sustainability, we recognise that embarking on compliance and annual reporting can be a daunting task. Our team has extensive experience in compliance reporting and data analysis to meet regulatory requirements. We can provide a range of services to help you get through this stressful time.

We can assist with:

- Report drafting and compilation
 - Annual Environment Reports (Mining Act 1978)
 - Annual Audit Compliance Reports (Environmental Protection Act 1986)
 - Compliance Assessment Plans and Reports (Environmental Protection Act 1986)
 - Works Approval Compliance Reports (Environmental Protection Act 1986)
 - NPI and NGRS Reporting
 - Waste Inventory Reporting
 - Groundwater Monitoring Summaries & Annual Reports
 - Clearing Permit Reports
 - Global Reporting Initiative (GRI) compliant sustainability reporting
 - Other reporting for compliance and voluntary reporting needs
- Third party review and audits of reports
- Provided advice and support for improving report transparency
- Mapping and GIS support
- Report planning and data collection tools
- Analysis of environmental monitoring data
 - water quality
 - water levels
 - emissions
 - waste
 - clearing and disturbance

Reporting requirements have increased in number and complexity. Please get in touch to find out how we can help with preparing or reviewing compliance reports and data.
