

# ENVIRONMENTAL SERVICES

The integration of sustainability and environment into all facets of a business will ensure long-term success and proactive environmental management. We aim to provide helpful solutions to achieve the most appropriate, practical and cost-effective environmental outcomes. Integrate Sustainability offers a range of environmental and sustainability services to assist clients in minimising their environmental impacts.

## Services include:

- Environmental and sustainability integration and awareness.
- Environmental impact assessments.
- Baseline survey and study facilitation.
- LGA, State and Commonwealth approvals - advice, submission and stakeholder liaison.
- Environmental compliance mapping and audits.
- Environmental monitoring, including planning and implementation.
- Closure planning, rehabilitation and restoration.
- Project scoping and feasibility assessments.
- Environmental expert and peer reviews.
- Risk assessment and incident investigation.

Integrate Sustainability continues to establish and maintain strong working relationships with a broad range of expert sub-consultants and field specialists giving us the ability to integrate them into our project teams to provide specialist advice and assistance when required.
