

STAKEHOLDER ENGAGEMENT

Stakeholders are those that have an interest or concern in your organization and its actions. Stakeholders can influence the success of your current activities, and affect the implementation of planned activities. Integrate Sustainability provides a range of professional support and advice services to assist businesses to engage and connect with their stakeholders effectively. We understand that creating relationships built on trust and respect go a long way in building strong and lasting businesses.

Services include:

- Stakeholder mapping and identification.
- Implementation of engagement strategies, promoting positive relationships and outcomes.
- Independent meeting facilitation and negotiations.
- Develop and implement Stakeholder Management plans.
- Identify community needs and implement community development programmes.
- Develop and implement communication strategies and plans.
- Risk identification and mitigation.
- Facilitate community information workshops and distributions.
- Implement community feedback and enquiry processes.

Integrate Sustainability can provide in-house expertise and professionals for on-ground support and project implementation.

We understand that the needs of every community and stakeholder differ. Therefore we will work with clients to tailor an approach to assist in achieving positive and sustainable outcomes.
